### What's New in the O O CleverCache Server Edition?

If you have problems with your antivirus or anti-malware, because they don't work properly, you should uninstall your antivirus program. If you have some issues with your system performance, because of

this, you can get rid of your browser or start an analysis of the system files. You can remove them manually, but this procedure can take a long time, or you can use a tool which will get rid of them easily. O&O

CleverCache Server Edition, a software program which has a powerful virus removal program, will allow you to delete unwanted data from your computer without deleting the necessary data. The program will search and remove unused files, but it will keep your important

data on your hard drive. O&O CleverCache Server Edition also has a feature named Memory Cleaner, which will scan the hard drive for unused data and remove them, without a need for user intervention.
