SeekFast Crack + Latest

SeekFast Crack Mac is an easy to use application designed to help you find a certain phrase or specific key words with in a document, even though you do not know which file to search in. The software can scan the contents of numerous text files within a folder and identify the desired text.

Simple and facile interface  
SeekFast features a simple and user-friendly interface and it is capable of easing your search for the desired text. If you do not know the title of the document you seek, the software can help you search it by its contents. Thus, SeekFast can easily scan batches of text files and display the paragraphs containing the key words or phrases. You need only specify the path to the local folder where text files are located and type in the key

words you are looking for. The software can scan the folder and all subfolders as well. You can enable the case sensitive search or match the words exactly, for a more accurate outcome. Access results The software displays the results of the search in order of their relevance, by default.

However, you may choose to view them in alphabetical order or listed by the date of their creation. The results are listed under the name of their document of origin. You can simply click on one result and

the software displays the entire content of the file. DOC, DOCX, XLSX, PPTX PDF, HTML, RTF or ODT formats are supported, along with many other types of text, help, Java, properties, log or XML files. The program, however, cannot process PDFs larger than 16 MB or other files larger than 50 MB.

Conclusion SeekFast can prove a useful tool, when you have stored hundreds or thousands text files, under wrong names, random titles or when you simply do not

remember the file's name.

The software can match any piece of text, in any language, as long as it is written with Latin characters, and thus ease your search.

IntelliScanner is a free utility  
designed to search for a  
specific phrase or key words  
in a Microsoft Office  
document, as long as it does  
not exceed 50 MB. The  
software is particularly useful  
for the case when you cannot

remember the filename or path of a desired file.

**Advanced search** The program can search any Microsoft Office documents. Thus, the software has various features which make the search for desired content simple, efficient and precise. The software has two tabs, “Search” and “Find,” each of which is independent of the other. The “Search” tab lists all open documents, regardless of their file type. Thus, you can search for a desired text in any document

regardless of its file format. The software lets you perform several advanced searches, for example, you can look for a text on a specific page or in a specified line. You can do so by means of page number or a row number. You can search for a text on a page or in a particular paragraph, in a specified word or in the whole document. The “Find” tab can find a desired text in a selected document. You can specify the content to search in a specific line, in a word, in a whole paragraph or in the

whole document. The software is capable of searching for texts with single or double quotes. You can limit the search to the searched file only, but you can also do so in subfolders. You can enable case sensitive and search the files for the desired key words. The software has the ability to perform fuzzy search as well. IntelliScanner Features: Advanced search options The software lets you search for desired text in specific page, paragraph, line or word in a specific line or in

a whole paragraph. You can also find a text on a specific page or in a specified line, in a word or in the whole document. IntelliScanner can search for a text with single or double quotes. You can limit the search to the searched file only, but you can also do so in subfolders. You can search the contents of the entire file or enable the option to search only within the file. Find a specific text in a specified line, in a whole paragraph, in a word or in the entire document. Case

sensitive search Search for a text with a single or double quotes, and enable the case sensitive search option.

Searches the entire file or in subfold 2edc1e01e8
