Aloni and her ilk are engaged in dangerous nonsense — and hint that real thought about the understandable distress of Jewish people in the Middle East can't be allowed to continue. The colossal fallout from the Fukushima nuclear reactor facility accident in Japan — including the devastating tsunami — should remind all of us of the danger of nuclear power, even though government agencies, including all of those in Israel, continue to promote nuclear energy as both safe and salvation. There are decades of forests of green plants that have drowned by tsunami, in Japan — but it is a cautionary lesson for all of us to reflect that nuclear power, at least in its current state, is a dangerous

Leaving aside the dangers of purging collective memory, this tactical use of history disrupts efforts to systematically educate about the Nakba." The presence of this "organized effort" to "disrupt efforts to systematically educate about the Nakba" is a non sequitur.
